Irish Website Design 2018

Background

In 2018, the National Library of Ireland Web Archive and The 100 Archive have partnered to preserve Irish website design. Ten websites from the 100 Archive's overall selections (across print and digital design from small flyers to major identity projects and everything in between) from 2010 to 2014 have been selected to be archived and preserved by the National Library of Ireland for future generations to come.

Site selection

Site selection was carried out by Aideen McCole and David Wall of the 100 Archive in collaboration with Joanna Finegan.

Crawl parameters

Eleven websites in total were included in this crawl.

Scope and content of resulting collection

- 10 websites were selected by the 100 Archive team.
- The website of The 100 Archive was also included in the collection.
- All sites were successfully captured but a technical issue has prevented some images from displaying correctly in the archived version of <http://matthewhilton.com/> and <http://2013.agi-open.com/>.
