For all of those who have waited
so long to be found
FOREWORD
Revised

Before discussing the Consolidated Index itself, a few words of explanation are probably in order. Those readers who have not yet had occasion to examine the holdings of the Genealogical Office will, of course, not understand why a consolidated index is necessary. Those of you who are trying to follow a family through the Manuscripts, however, will hopefully find this consolidation a happy shortcut to discovering where information on a given surname is likely to be found.

Friends who have become aware of this project have commented that this is a repository that is largely misunderstood as to its value to the researcher in family history. It is true that the body of records was gathered primarily for the benefit, originally, of the Kings of Arms to determine heraldic rights. However, there is a great deal of value and interest to the family history researcher, whether or not you believe the individuals to be titled. The very fact that there are 331 surnames beginning with A, 986 B’s, and 925 C’s will illustrate the fact that records of a great number of persons other than nobility and landed gentry are to be found in this repository, along with a good sprinkling of records of those living in England. It has also become apparent that this repository may well be an alternate source to determine the location in Ireland of a particular surname. The same is true of England.

A disclaimer first, however: no guarantee is made that the references given are correct. The material herein has simply been copied from the original indexes and no attempt was made to verify numbers or page numbers. An effort to make such a verification would probably swallow up several lifetimes. There have been some difficulties in reading the indexes, due in part to handwriting and in part to my use of paper copies made from microfilms. For this reason you will commonly find numbers stated as, for instance “601 or 641”, where the handwriting could be read either way. In a few instances I have had to show ? in place of a number that was totally illegible. If you do not find the reference where I show it to be, I encourage you to go back to the original entry in the index in the event that I misread or mistyped, and that you try looking on pages in the general area of the reference.

What has been included? That determination was something of a puzzle, but I made an arbitrary determination to start with the indexes listed by John Grenham on pages 74 and 75 of his TRACING YOUR IRISH ANCESTORS. Mr. Grenham has solved part of the problem by including the manuscript number for each reference. No effort was made to include the material to be found in Hayes MANUSCRIPT SOURCES – this consolidation is likely to become quite unwieldy without it, and Hayes' work is relatively easy to find and to work with.

Film call numbers, both for the National Library of Ireland (NL) and the Family
History Library in Salt Lake City, UT, U.S.A. (SLC) are found in the section of this book entitled “Manuscript Numbers included in the Consolidated Index and their Corresponding Film Numbers”. In the U.S. it is not necessary to go to Salt Lake City since, of course, the microfilms can be seen at a local branch of the Family History Library. If you find difficulty in finding a branch local to you, let me know and I will be happy to let you know where the nearest one is, or just call the Family History Library in Salt Lake for that information. There are also branch libraries in areas outside the U.S., including Australia, England, Ireland and Scotland. There are a few references for which there are no film numbers because the particular record has not been filmed up to this time, and it will be necessary to consult the original records in those cases. The original records are housed at the Genealogical Office on Kildare Street, Dublin near the National Library of Ireland. Unmicrofilmed records can be consulted at the pleasure of the Chief Herald. Access to the Manuscript Room is by pass available from personnel at the National Library. Many of the old records are fading and brittle, and we can be very grateful that the most useful records have been microfilmed.

The following are the Indexes which have been included:

**MS 117.** Mr. Grenham points out that much of the material in this index duplicates material found in other more frequently used indexes, but he gave a list of those items not included in other indexing efforts, and it is these items which I have picked out of MS 117. An interesting sidelight: In skimming through the film containing MS 117, I found that there are two versions of MS 117. I have used the second version because it includes all of the items listed by Mr Grenham as follows:

- Antrim Families MS 213
- Fisher MSS 280-85
- Irish Arms at the College of Heralds MS 37
- Irish Coats of Arms (Fota) MS 526
- Heraldic Sketches MS 125
- Betham Letter Books MS 362-78
- Ecclesiastical Visitations MS 198-9
- Reynell MSS 445.

Both versions of MS 117 are found along with MS 115 and 116 on SLC #100188. The references in MS 115 will be added at a later date. MS 116 was not used because it is unfinished. If it appears that there is information to be found there that is not duplicated elsewhere, it will be added also at a later date.

**MS 148 Index to O’Ferrall's Linea Antiqua.** The material referred to is found in MS 145 (Vol. I), MS 146 (Vol. II), and MS 147 (Vol. III). I have used the index found at the end of Vol. III since it appears to be more complete. I have included the volume numbers here because all of the references begin with a Roman
numeral which refers to the volume, followed by an arabic numeral which refers to the page number in the particular volume.

**MS 255-60 Index to Alliances in Prerogative Wills** (Betham). If you have had occasion to investigate this index, you will recall it as being titled “Collectanea Genealogica” with no reference to either alliances or wills. The index itself is two page spread of volume and page numbers, which I have shorthanded into references which look like 3/101 or 15/210. The first number is the volume number and the second the page number in that volume. See the film number listing, as I have broken down what volumes are on what films – each volume is one manuscript, but the manuscript numbers are not the same as the volume numbers. What you will find in the records themselves is an abstract by Mr. Betham of the original will giving names and relationships of those mentioned in the will, which he used to formulate the sketch pedigrees found in other notebooks mentioned below. In some cases it has been found that he didn't copy down all the information in the original will, but this is what we have unless a copy of the original turns up somewhere. This index has been included because the index is a part of the Genealogical Office records. The actual small books containing the abstracts are physically located at the National Archives in Bishop Street, Dublin. I had occasion to view one of these books in 1994 and found that the handwriting had faded to a light brown. The microfilms are much easier to read, being in black and white, and the writing appears much larger on the microfilm reader.

There is also a ten volume item labelled simply “Lodge” which I have included in the hope that I will find the underlying material before Volume 1 went to press. It does not refer to Lodge’s Peerage. I recently acquired a copy of Analecta Hibernica No. 27 and found a reference in the lead article that leads one to believe that this manuscript is in the National Library.

See film number SLC #100113 for the index, and MS 223 through 256 for the abstracts. See the film number listing for specific references. Mr. Grenham points out that these MMS are also indexed by Vicar, although upon investigation, Mr. Vicar shows only the name of the deceased and year of death. The will abstracts commonly give additional information which will help to flesh out the family composition. The original notebooks are deposited in the National Archives in Bishop Street, Dublin.

**MS 386 Index to Funeral Entries.** Here again the actual title on the index is “Register of the Baronetage”. This is a particularly interesting and helpful index as it includes a remarkable amount of genealogical information in the index itself, which I have in turn transferred into the Consolidated Index due to concern that the researcher might miss it by not looking at the index after using the Consolidated Index. Almost all entries include the year of death and the place. Also there are items such as who the husband or wife was, where the residence was, who the father was and which son or daughter the individual was. The references are to MS 64 through 79, one volume per MS like the Collectanea Genealogica, and run from the years 1588 to 1729 with some exceptions, as follows:
Be sure to look in the rear of each volume for an index giving the page number in that volume for the name you are researching. Since I did not find this until after Volume I was issued, I will wait to include this information in a future revision.

The index is found on film number SLC #100142, and see the film number listing for specific film numbers for the records. In using these records in recent months, I have found them invaluable as they commonly give the names of the children as well as their spouses. Again, while these records deal primarily with titled people, it would be wise to investigate the records of those bearing your surname, as you may find the individual you are researching as a child. It is well to remember that only the eldest inherited the title, and the younger children and girls were just known by their surname. You may also run into the question of getting your lines back to this time period, as the bulk of the records are early to mid-1600’s.

**MS 422-3 Index to Arms** registered at the Genealogical Office. In attempting to locate this index I stumbled into MS 110, 111 and 111a-b-c-d-e-f-g which are indexed in their individual volumes. I then discovered that this series actually begins with MS 103. My references end with MS 111e because 11f is illegible and 111g has no index. These latter disabilities I hope to rectify at a later date. The references refer to material in the same volume.

**MS 470** – This is the index one is usually first referred to, and put off by! It is in three parts, each part indexing different manuscripts. All of the manuscripts are listed in order of Manuscript Number in the film number listing. Although this index (MS 470) is typewritten, a considerable amount of information has been handwritten in, including the relevant manuscript numbers.
I have made little or no comment with regard to content or value since what is valuable to my research may be of no value to yours, and vice-versa. Also, as we all know it's the little clues that add up to an eventual body of knowledge. If you have questions or comments, I will welcome them since this project is only of value to those who use it, and I recognize that it will only be used if it conveys what you need to know.
Manuscript numbers included
in the consolidated index
and their corresponding film numbers

The following list of manuscripts are those which are included in the Consolidated Index, insofar as they have been fully and correctly originally indexed. The microfilm call numbers for both the National Library of Ireland (NL) and the Family History Library in Salt Lake City, UT, USA (SLC) are also given. MS numbers not showing a National Library number must be accessed through the Manuscript Reading Room and is at the discretion of the Chief Herald.
